View of completed model

### Assembly Instructions : Three US letter sheets (No. 1 to No. 3)

\* Build the model by carefully reading the Assembly Instructions , in the parts sheet page order.

\*Hint:Trace along the folds with a ruler and an exhausted pen (no ink) to get a sharper, easier fold.

### Assembly Instructions

..... **Mountain fold (dotted line)**  
Make a mountain fold.

----- **Valley fold (dashed and dotted line)**  
Make a valley fold.

— **Scissors line (solid line)**  
Cut along the line.

— **Cut in line (solid line)**  
Cut along the line.

**Glue**  
The glue spot (colored dot) shows where to apply the glue.

● **Glue spot (Red dot)**  
Glue parts with the same number together.

● **Glue spot (Green dot)**  
Glue within the same part.

● **Glue spot (Blue dot)**  
Glue to the rear of the other part.

#### Tools and materials

Scissors, set square, glue (We recommend stick glue), pencil, used ballpoint pen, toothpicks, tweezers, (useful for handling small parts)

#### Assembly tip

Before gluing, crease the paper along mountain fold and valley fold lines and make sure rounded sections are nice and stiff.

#### Caution

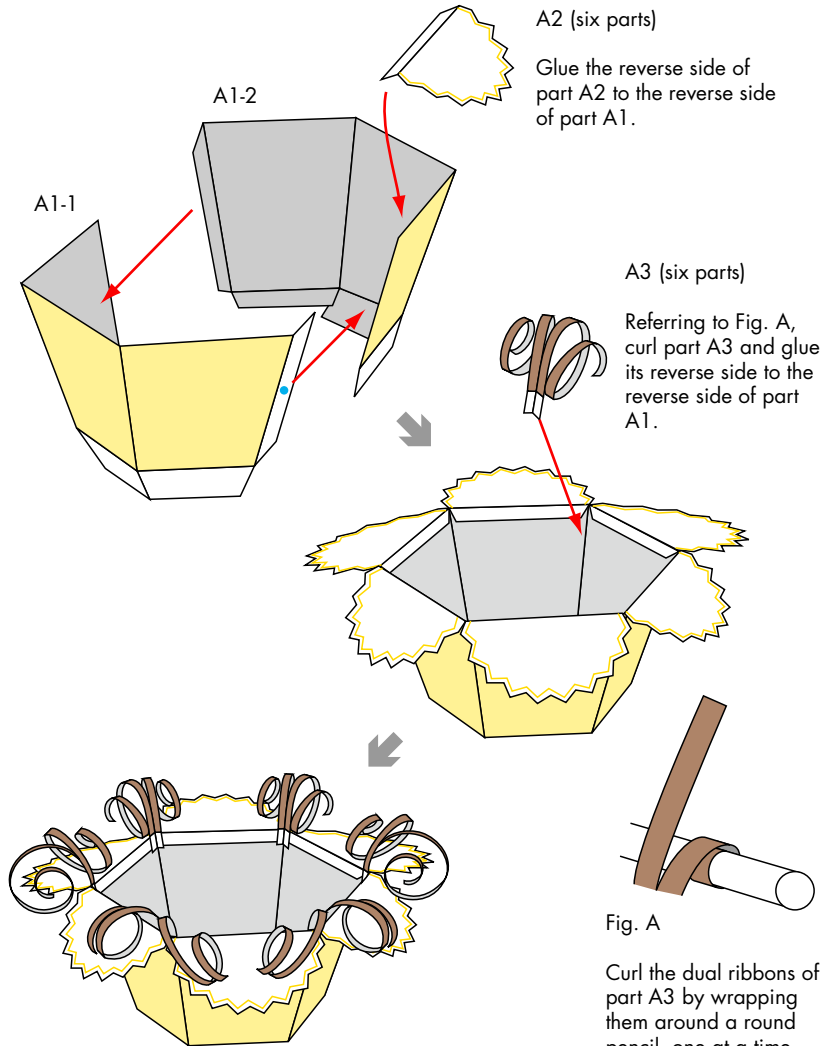

Glue, scissors and other tools may be dangerous to young children so be sure to keep them out of the reach of young children.

Before starting assembly:  
Writing the number of each section on its back side before cutting out the sections is highly recommended.  
(\* This way, you can be sure which section is which even after cutting out the sections.)

→ Indicates where sections should be glued together.

### Assembling the flower basket: Parts group A

## Assembling the roses: Parts groups Y, O, and R

You should have a total of six parts: two yellow [Y] parts, two orange [O] parts, and two dark orange [R] parts. These parts differ only in color (denoted by color codes). Shapes and assembly methods are the same for all colors. We recommend using wood glue for these parts.

## Assembling the core of the rose: Part 1 (Y1/O1/R1)

Step 1: Cut out along — .

Step 2: Fold down along - - - .

Step 3: Glue the reverse sides together.

Step 4: With the surface with the star mark on top, cut out along — .

Step 5: By keeping line 1 horizontal as you wrap the part around the pencil, curl line 2 into a spiral.

Step 6: Complete the core of the rose by gluing the area with the green dot in place.

### Tip:

After firmly gluing the two sides together in step 3, cut out the part while the glue is only partially dry and shape firmly to give it a curve. Be careful to avoid tearing the paper.

# Bouquet (roses) : Assembly Instructions

## Assembling the rose petals: Parts 2 - 11

Step 7: Cut out these parts using the same steps 1 – 4 you used to cut out the parts of the rose's core.

**Tip:**  
 Since the parts will take firm shape only if shaped while the glue is partially dry, assemble parts 2 - 11 one at a time, moving on to the next part only after completing steps 7 and 8 for each part.

Ex.:  
 Steps 7 - 8 for part 2  
 Steps 7 - 8 for part 3

Step 8: Curl in the directions indicated by the arrows, then glue into position.

## Part 12

Step 9: Cut out part 12 using the same steps 1 - 4 you used to cut out the other parts, then glue into position. The surface with the star mark goes on the inside.

## Assembling the rose: Combine parts 1 - 12

Step 10: Complete the rose by gluing these parts into position, one at a time, starting with part 1. Make sure all numbers and directions match for areas with red dots and these two symbols (pink and blue).

## Displaying the roses in the flower basket

Apply glue to the orange dots on the six roses, then glue them into the flower basket in the arrangement you want.
