Assembly tip

Before gluing, crease the paper along mountain fold and valley fold lines and make sure rounded sections are nice and stiff.

Caution

Glue, scissors and other tools may be dangerous to young children so be sure to keep them out of the reach of young children.

Before starting assembly:
Writing the number of each section on its back side before cutting out the sections is highly recommended.
(* This way, you can be sure which section is which even after cutting out the sections.)

→ Indicates where sections should be glued together.
→ Indicates where to insert sections. Do not glue the sections together.

Assembling the pot

Glue the six surfaces of part 1 marked with ● to the rear side of part 2. Although a mountain fold is used for the folds in the blades of grass on part 2, fold them outward where indicated here to make it easier to work with part 1.

Complete the pot by gluing the bottom in place.
