Angel's wings and halo (Christmas)

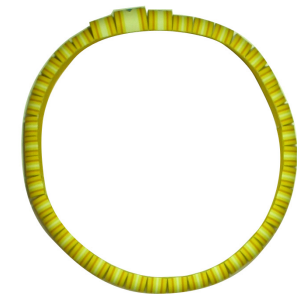

Angels are servants of God who appear in Scriptures, primarily of Judaism, Christianity, and Islam. In the early days of Christianity, people didn't imagine angels with wings, now their outstanding visual characteristic. The image of angels commonplace today are believed to have emerged later due to elements from other religions that had spread across Persia and other parts of the world. Although angels were generally imagined as young men at first, by the Renaissance, they came to be depicted in paintings, sculpture, and other works of art as women and children.

■ Parts list (pattern): Ten US letter sheets (No.1 to No.10)

■ No. of Parts: 22

*Build the model by carefully reading the Assembly Instructions, in the parts sheet page order.

Size of angel's halo: 40 - 60 centimeters
in circumference

This angel's halo can fit heads up to 60 centimeters in circumference. Cut off the decorations at the left end of part 5-3 to shorten the halo by one centimeter per decoration. For example, to make a halo 53 centimeters in circumference, use a pencil and a ruler to make a line connecting the dashes next to the number 53 above and below the pattern, then cut along this line, using the part remaining to the right to make your halo.
