

Cut out and glue FRONT SUPPORT to FRONT. Repeat this step for BACK and BACK SUPPORT. Ensure the bottom of both parts line up prior to gluing.

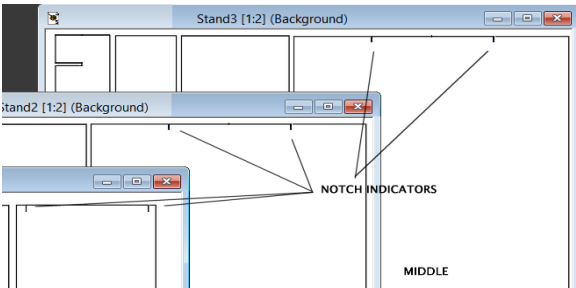

Glue FRONT and BACK to this part

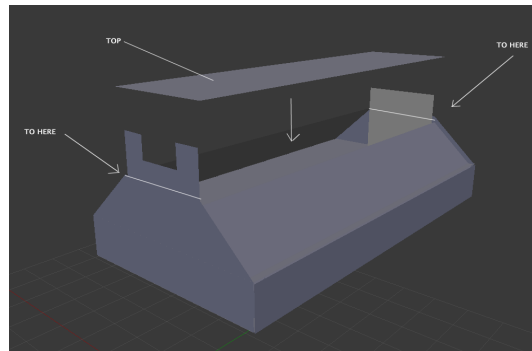

Form the following support structure using the STRUT LEFT, STRUT RIGHT, STRUT FRONT and STRUT BACK.

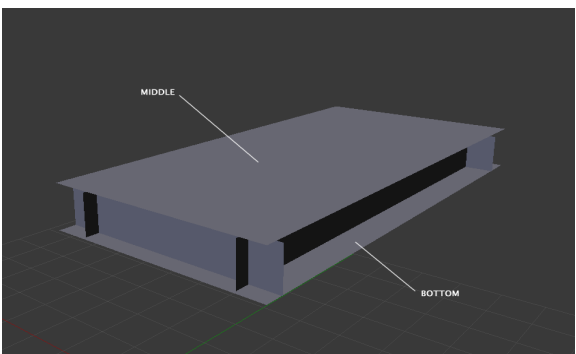

Glue NAMEPLATE LEFT 1 and 2 and NAMEPLATE RIGHT 1 and 2 as shown.

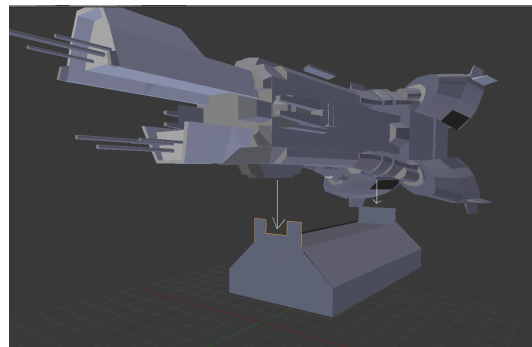

The TOP, MIDDLE and BOTTOM pieces have notch indicators on them. These are in position to show where to cut alignment slots that will help accommodate the FRONT SUPPORT and REAR SUPPORT. There is no depth indicator as it will depend on the card stock being used to build the stand however 1mm depth is a good start.

Glue TOP in position and finally glue the MCRN name plaque and ship name to the front to complete the stand.

Glue Middle and BOTTOM to this support structure.

Mount the model to the stand, use the lower rail gun mount as a guide on positioning the model.
