Toy Series

Blow Tops

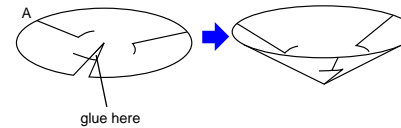

These blow tops are spun by breath power, instead of using fingers or a string. The air rushing downward from above pushes on the upturned blades, which in turn spin the top. The top won't work if you blow too strongly or too weakly. The secret is to blow straight down at the center of the top with one long breath.

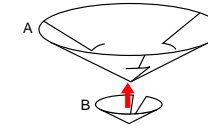

## ★ Directions

Print out this page and cut out each individual part along their cut lines.

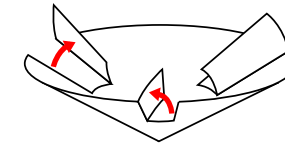

**1. Glue the tabs on the parts**  
Bend the tops into shallow cones, as shown in the figure, and glue the tabs to the backs of the tops (part A).  
\* The tabs will break free easily, so hold them in place with your fingers until the glue is good and dry.

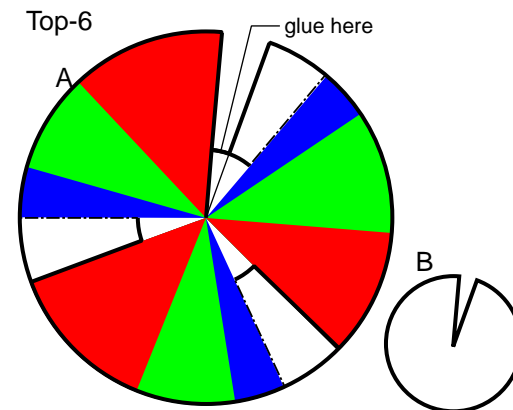

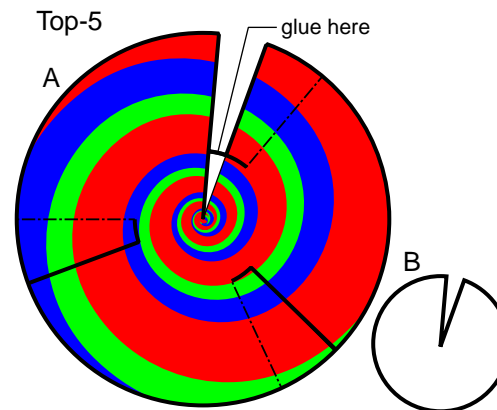

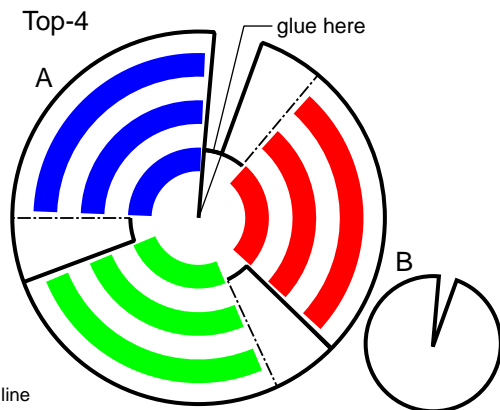

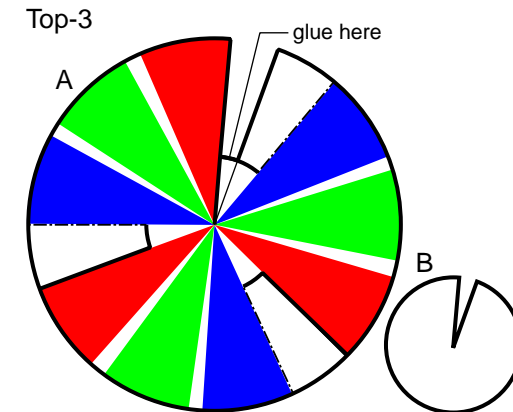

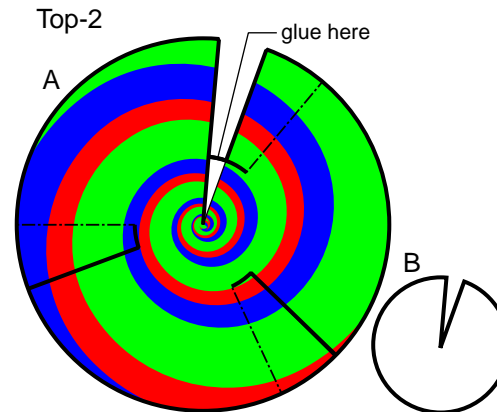

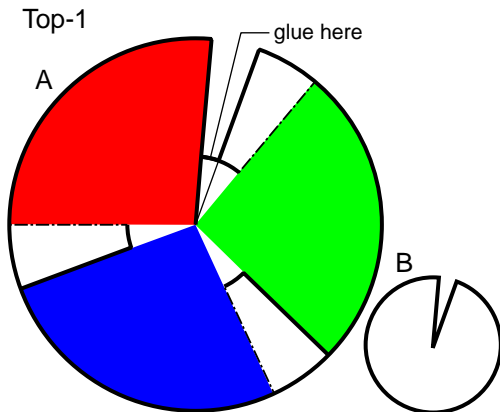

**2. Glue parts B to the backs of parts A**

**3. Bend the vanes upward**

\*Cut out the card above and save it. You can collect the cards from each of the Papercraft projects to make your own mini-book!
