SIGNS & SIGNPOSTS

These signs have been designed to be as generic as possible. Instead of giving buildings names I decided to keep things more abstract and functional. As such, the signs are abstracted symbols that can be used for almost any situation.

- Cut, fold and score where noted. Pay special attention to the signposts as there is a small slit at the base of each post.
- fold over and glue the sign post being careful not to paste the base flaps (Area where base slit resides).
- Glue the signposts anywhere on any building you wish to use in this manner.
- Once the signposts are in place simply drop on the sign of your choice!

Cut Through Black Lines and Borders ———— ✂
Score and Fold Along Dotted Lines
Score and Fold on Reverse Side ↻
