

Left rear façade

Middle rear façade

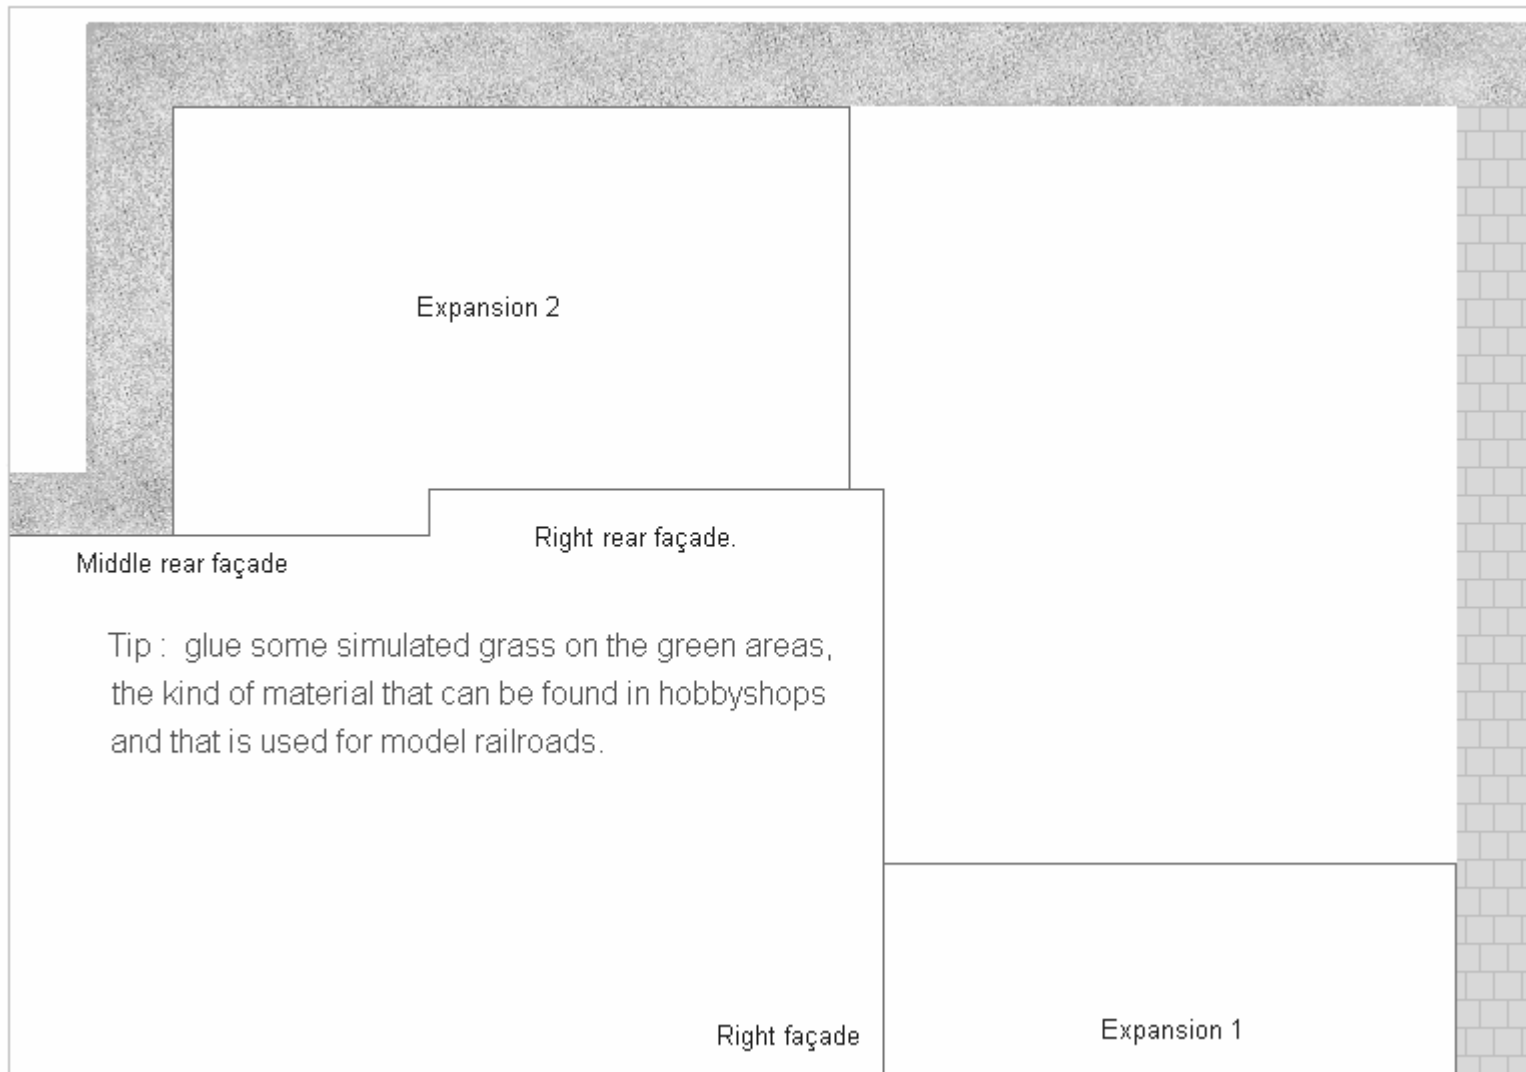

Cut out all bottom lines of every wall as straight as possible, to ensure it will stand straight on it's floorplan, without seams. Please make your own flaps to glue the walls to the base.

First glue all walls together, then give each wall it's own re-enforcement, made out of extra thick cardboard.

Then measure and cut the flaps, gluing them into position. Important : make sure all corners are exactly 90 ° .

Left façade

Cut out floorplan on grey line \_\_\_\_\_↑

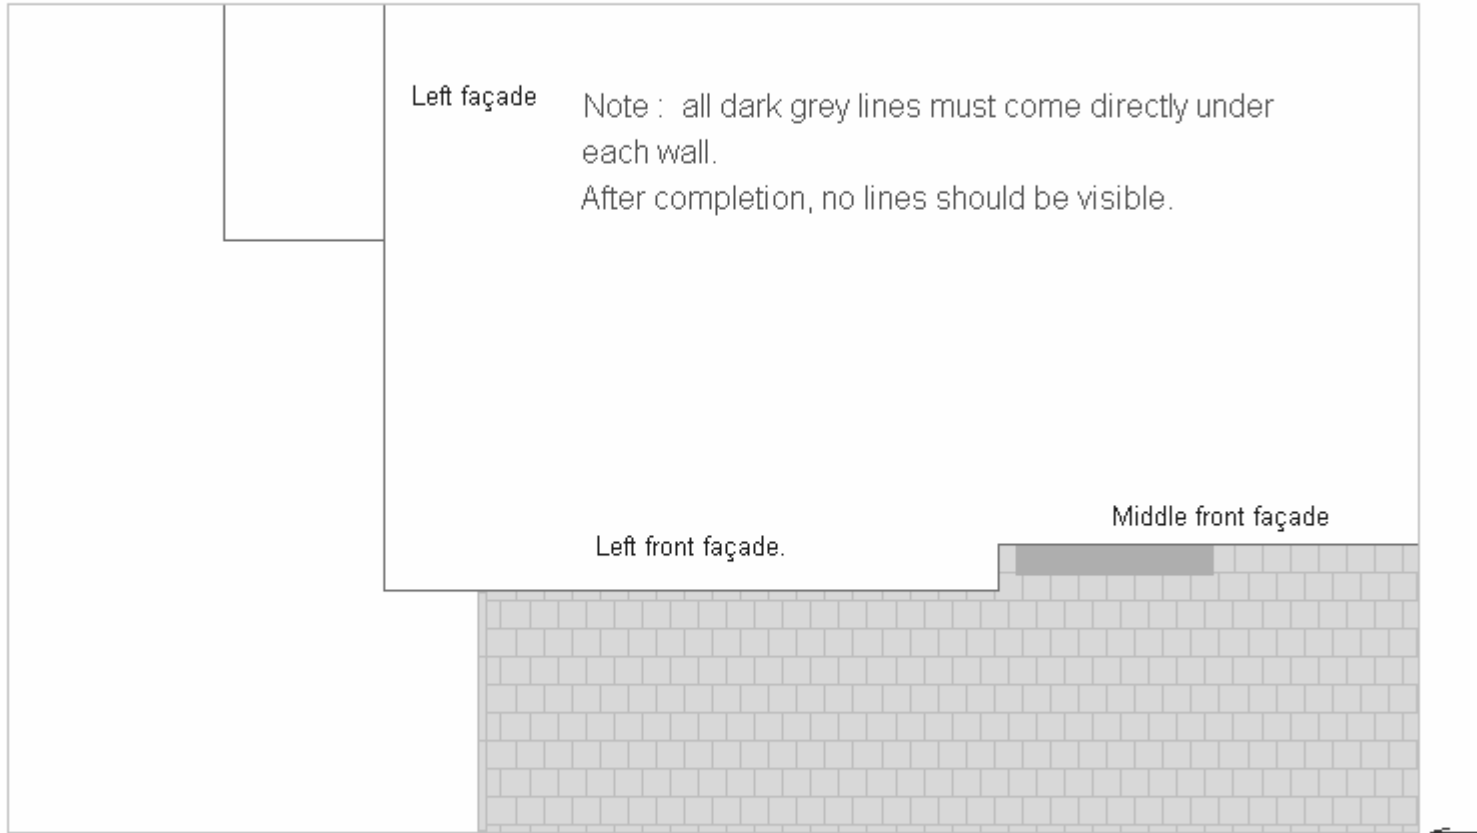

Left façade

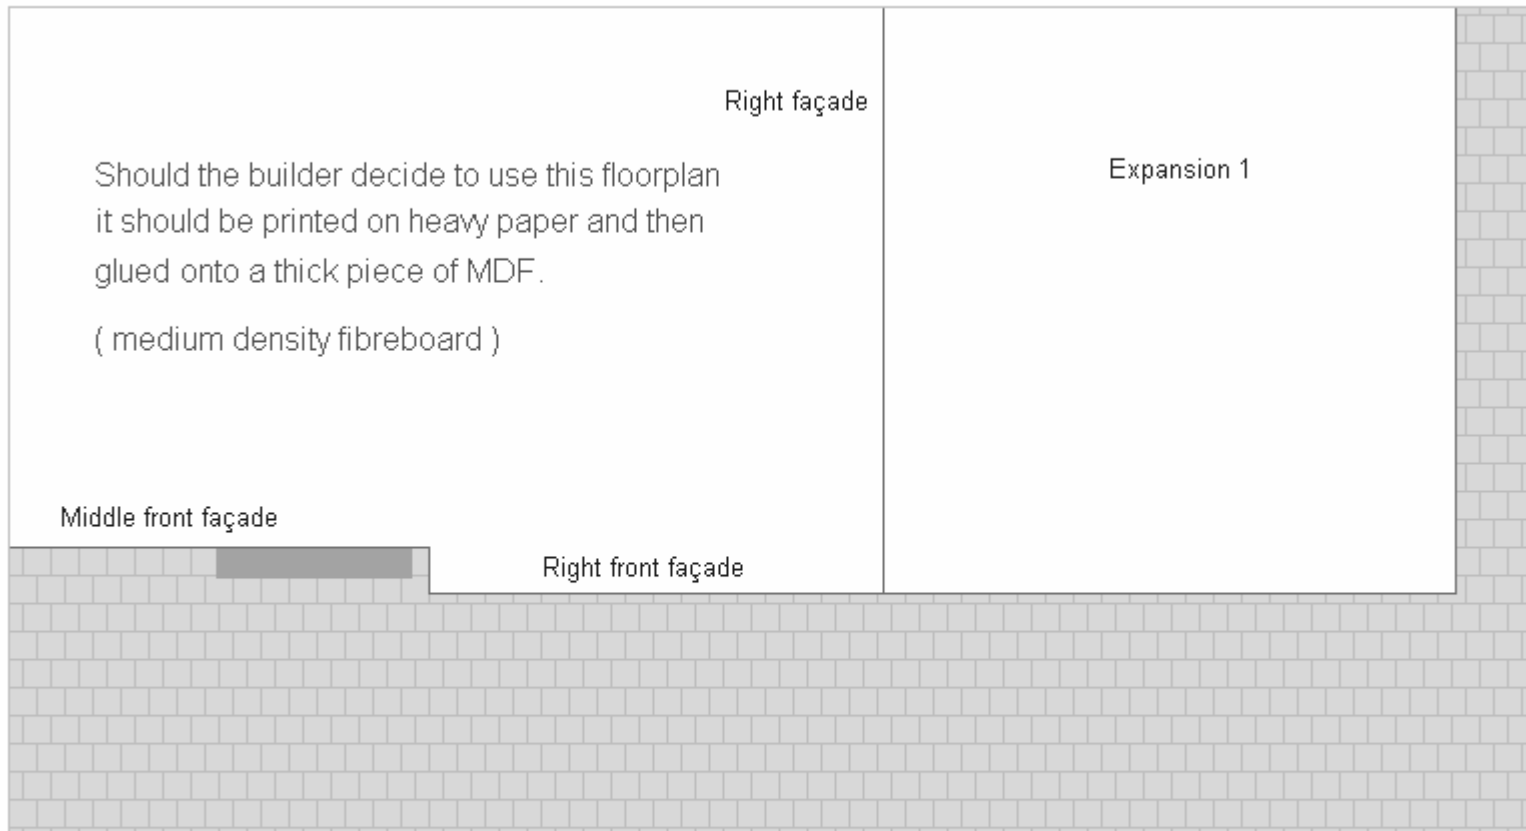

Note : all dark grey lines must come directly under each wall.  
After completion, no lines should be visible.
