

Smithshop

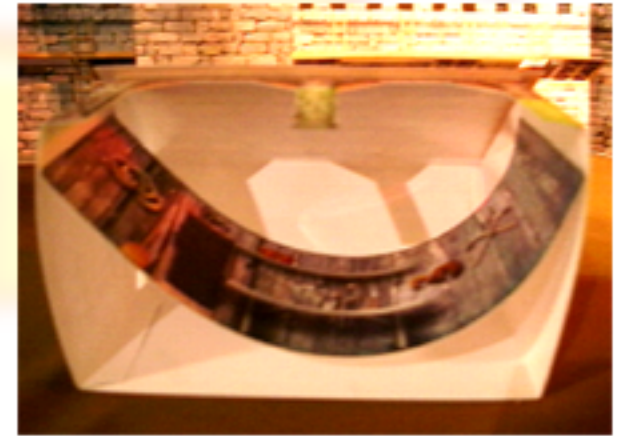

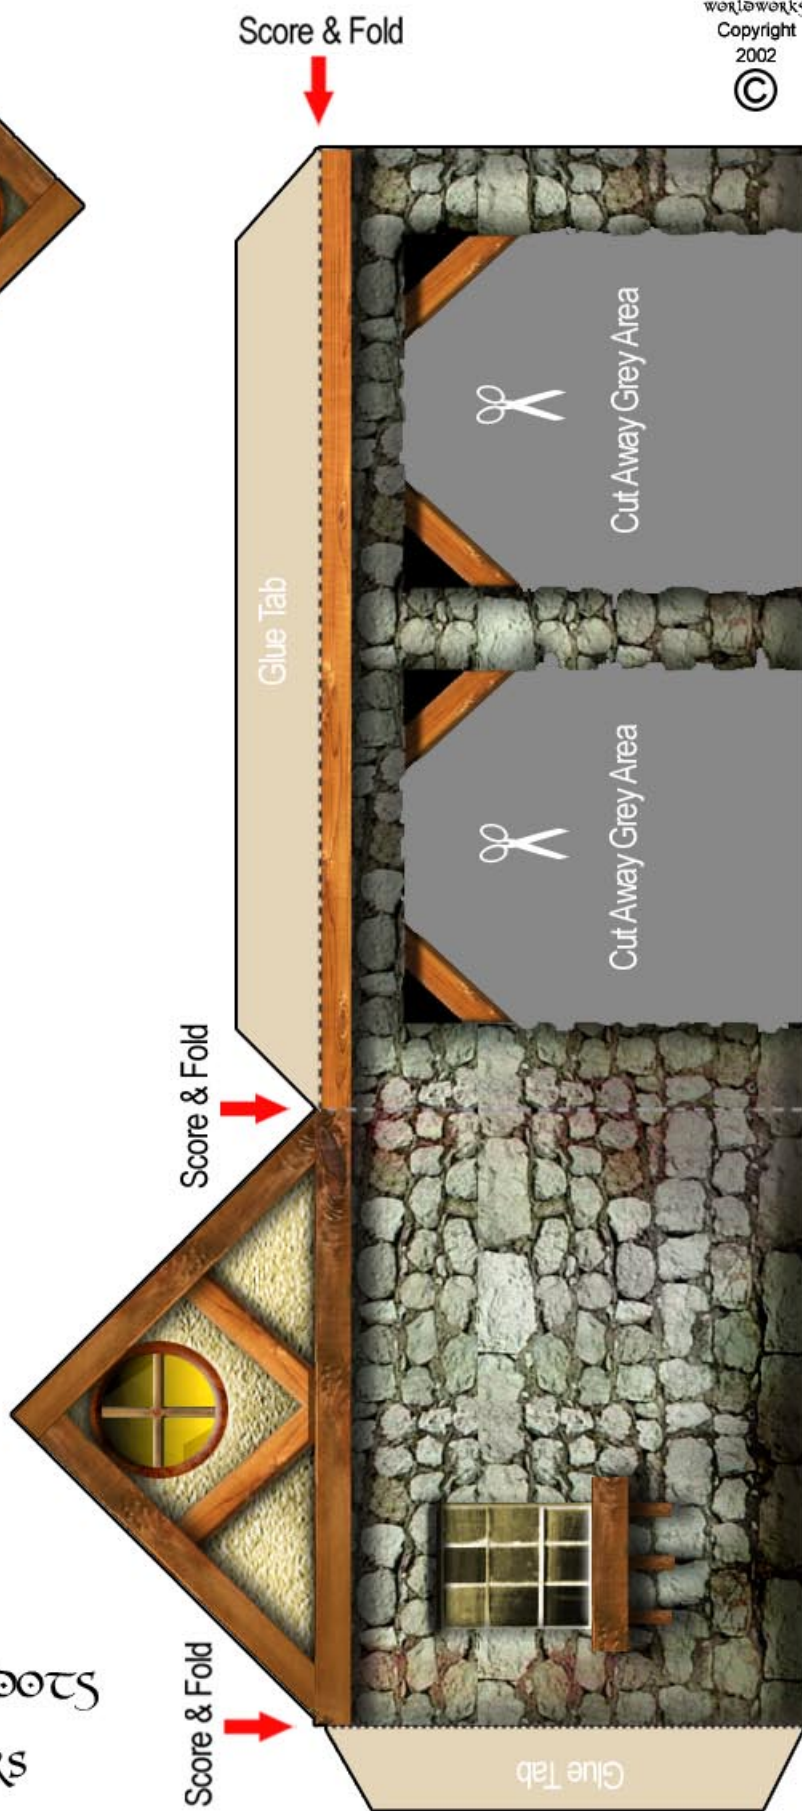

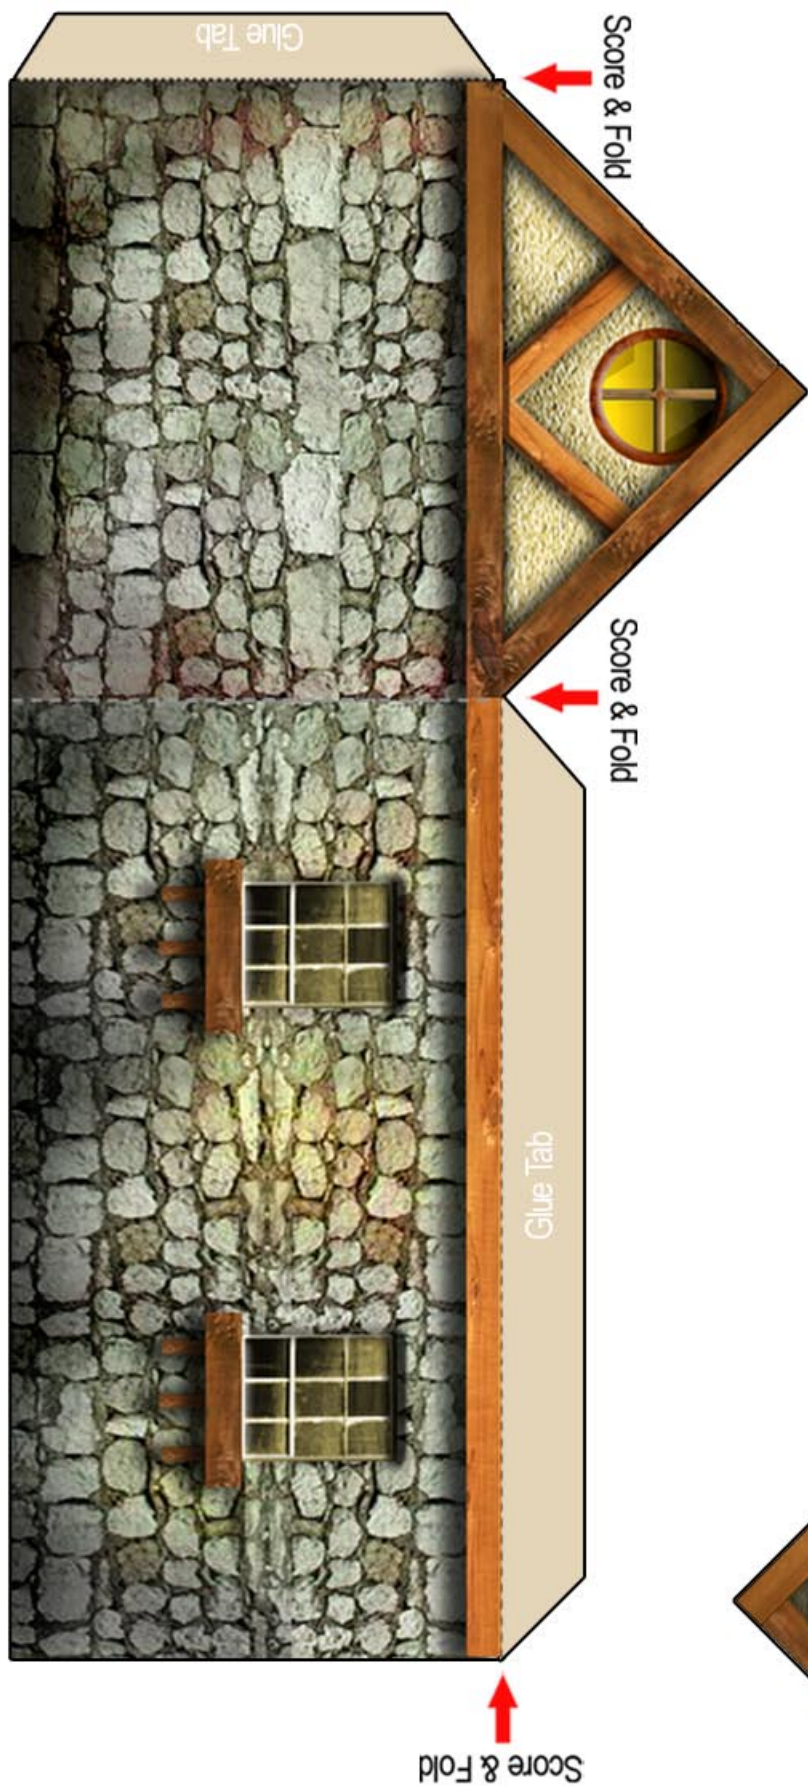

Difficulty Rating: 3

This is actually a preview building from the coming "Village Works Vol # 01" set but it fits nicely into the castle courtyard.

Building Instructions

- Start by printing off all the templates for this model
(Tip: Give each page a couple of minutes to dry before cutting, See "Printing Tips")
- Cut out all of the various pieces for the model (See "Cutting Tips").
Score and fold where marked
- Glue the tab from one wall to the opposite side of the other wall.
- Take the roof section from page 2 and glue the roof tabs from page 1 to this section. Be sure to leave a small overhang around the building.
- Take the interior section from page 2 and glue one tab to the inside of the archway wall. Now bend the section to form an arch and glue the other tab to the other side of the archway wall. (See Pictures above)
