

"Throneroom"

- Cut, score and fold as noted. There are three reverse side scores on the throne itself. These are located at the base of the back support and one below each armrest at the base of the seat.
- The stone riser, carpet and red step are self-explanatory so lets jump to the throne.
- Once folded the throne goes together in much the same way as the standard chairs do. The only real difference here is the addition of armrests. You'll notice that the back of the chair at its base has no glue tab. This design feature allows the bottom support at the back of the chair to swing free and prevents the throne from falling backwards. Angle this section outward.
