CASTLEWORKS ULTIMATE™

S simple ROOF

SIMPLE ROOF

A basic roof covers in two styles with optional windows. These are very quick builds and offer a diverse visual style for all types of building layouts.

Fold over and glue the edges of the roof.

Bring forward the roof supports. Glue down one full side of the roof supports in the areas shown. Be sure the outermost supports are flush up against the inner folds.

Once one side has been attached, give it a short drying period before securing the other side.
