CASTLEWORKS ULTIMATE™

CURTAIN ARCH

complexity

CURTAIN ARCH

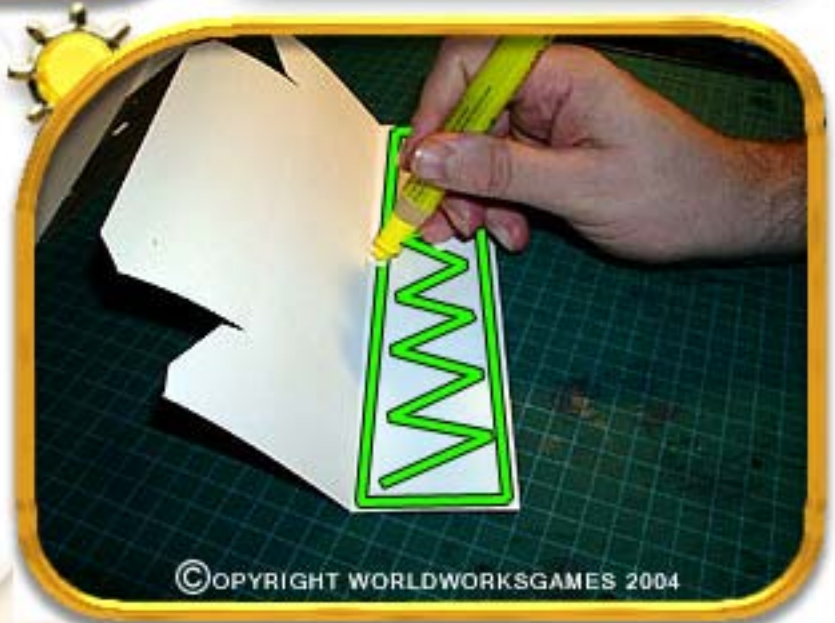

completion time

The Curtain Arch wall sections can be placed at the base of walls and buildings for variation. These sections can also be used as basic structures (Smithshop, Stables). For additional flexibility these structures can also be glued back-to-back to create a completely new building type.

Cut, score and fold your model as shown.

Apply a thin but even bead of glue around the inner edge and center of the model (as shown).

Fold over and burnish the wall section. Make sure to squeeze out any air bubbles and spread the glue to every edge/corner.

Once dry cut away the internal white space from the arch sections.

Apply a thin bead of glue to the side wall tab.

Flip the model over and apply pressure to the tab connecting it to the roof.

Repeat the above steps on the opposite side.

Take a few seconds and "Edge" your models with a dark felt. The end result is worth the extra minimal effort!

What is "Edging"? Please refer to the included Beginners Guide for step-by-step instruction.
