**STEP 1:**

Cut, score and fold your model as noted. **DO NOT REMOVE** the white space surrounding the model at this time. Fold over and glue the piece together (so that the image appears on both sides) allowing a one-minute dry time.

**STEP 2:**

Carefully remove the curved white space around the model. Bend the outside “Clip-it” flaps 90 degrees. As an optional final step you may wish to cut around the inside perimeter of the doorway creating doors that you can open and closed as needed.
