

MODEL TYPE:	AXE AND SPINNER TRAPS
DIFFICULTY:	3 out of 5 <i>(multiple cuts)</i>
APPROX BUILD TIME:	Moderate– 10 to 15 minutes <i>(Time may vary depending on skill level)</i>
DUPLICATIONS <i>(Suggested):</i>	2 to 4
EDGING COLOR:	Brown or Black <i>(What is “Edging”?</i> <i>Please refer to the included “Beginners Guide”.</i>

STEP 1:

Cut and score your model as noted. **DO NOT REMOVE** the white space between the blades at this time. Fold over and glue along the middle line of each trap section (image appearing on both sides). When burnishing (applying pressure) be sure to push the glue to all corners and edges. Allow a one-minute dry time.

STEP 2:

Cut away the remaining white space between the blades and fold the end Clip-it tabs inward 90-degrees. If you intend to secure your traps against other walls using the Clip-it flaps you can stop building at this point. If you prefer to have your traps as freestanding models you will need to assemble the trap bases and glue them to the sides of your Clip-it flaps. (See above photo)
