CREVASSE

Difficulty Rating (Out of 10): 0 (If you can't cut a straight line then this model is the least of your worries)

Recommended Duplications: 2 (Two is all I've ever needed although you may want to create a dungeon dominated by deadly pitfalls and crevasses)

Steps:

- Cut along black border. Be sure to cut straight through the dominant black line separating the models. There are 2 crevasses on one sheet.
- OPTIONAL: Mount your crevasse tiles on foam-core or cardboard to prevent warping.

Wow...that was hard wasn't it? Now, onto something more challenging!
