GIANT CRYSTALS

Quick note: I do apologize if some of the instruction sets are repetitive but many models follow the same steps.

Difficulty Rating: (Easy) Giant crystals to bring the air of mystery to your cavern design. An important strategic space filler as well.

Recommended Duplications: 1 to 2 sheets.

Steps

- Cut, score and fold where marked. It is important to be as accurate as possible with your scoring to prevent misaligned pieces. Be sure to cut the internal form of the crystals only **AFTER** you have "sandwich glued" the entire section together. *(Please read the "Beginners Guide" for proper cutting and scoring methods)*
- Sandwich glue the crystal sections together. Be sure to allow a five minute dry time.
- Cut away the excess white space leaving only the crystal form. You may want to do this free hand depending on your skill level as it speeds things up.
- Slide opposing crystal sections through each other forming an X *(when seen from the top, See above photo)*

Edging Color: Grey felt *(What is "Edging"? Refer to the "Beginners Guide" included with this model set)*
