## WATER/LAVA & THE FALLS

**Difficulty Rating: (No Brainer)** No self respecting cave would be complete without fire and water. Very simple environment tiles that bring your cavern to life! The Waterfall sections have been designed with different lengths so that you can place them staggered on multi-leveled risers. A very convincing effect!

**Recommended Duplications:** 1 sheet of each. You should be able to get by on one sheet of each but if not its VERY easy to make more.

### Steps

- **Water Fall:** Cut, score and fold where marked. In the case of the water stream and lava flow there is no folding involved. *(Please read the "Beginners Guide" for proper cutting and scoring methods)*
