STALAGMITES

Quick note: I do apologize if some of the instruction sets are repetitive but many models follow the same steps.

Difficulty Rating: (Easy) Quick build models that may seem unnecessary but really add allot to the overall environment. Stalagmites are also an important tool for strategic design as they occupy exactly one hex of floor space.

Recommended Duplications: 1 to 2 sheets.

Steps

- Cut, score and fold where marked. It is important to be as accurate as possible with your scoring to prevent misaligned pieces. Be sure to cut the internal form of the stalagmites only **AFTER** you have "sandwich glued" the entire section together. *(Please read the "Beginners Guide" for proper cutting and scoring methods)*
- Sandwich glue the stalagmite sections together. Be sure to allow a five minute dry time.
- Cut away the excess white space leaving only the stalagmite form.
- Slide opposing stalagmite sections through each other forming an X *(when seen from the top, See above photo)*

Edging Color: Brown felt *(What is "Edging"? Refer to the "Beginners Guide" included with this model set)*
