

FLOATING WALLS

Quick note: I do apologize if some of the instruction sets are repetitive but many models follow the same steps.

Difficulty Rating: (Easy) Quick and effective models for creating MASSIVE caverns and chambers.

Recommended Duplications: 6 to 8. I found that with cavern design the more free floaters you have the better!

Steps

- Cut, score and fold where marked. It is important to be as accurate as possible with your scoring to prevent misaligned pieces. Be sure to cut away the top bumpy sections only **AFTER** you have "sandwich glued" the entire wall section together. *(Please read the "Beginners Guide" for proper cutting and scoring methods)*
- Fold over and glue or "sandwich glue" the individual wall sections. Be careful not to glue the bottom support tabs together. Flip one tab up while gluing. Allow a five minute drying time for sandwiched sections to prevent warping.
- After the walls have dried cut away the bumpy upper ridge.
- Fold the bottom support tabs out and you're all done! *(See above photos for reference)*

Edging Color: Brown felt *(What is "Edging"? Refer to the "Beginners Guide" included with this model set)*

HIGH CHAMBER WALL

Quick note: I do apologize if some of the instruction sets are repetitive but many models follow the same steps.

Difficulty Rating: (Easy) Indispensable wall section that gives your caverns the grandeur and scale that they deserve!

Recommended Duplications: 4 to 6. If you're creating a cave network dominated by massive open chambers then this model is a must.

Steps

- Cut, score and fold where marked. It is important to be as accurate as possible with your scoring to prevent misaligned pieces. Pay attention to the score lines on this model as they do **NOT** extend on both sides. Be sure to cut away the top bumpy ridge section only **AFTER** you have "sandwich glued" the entire wall section together. *(Please read the "Beginners Guide" for proper cutting and scoring methods)*
- Fold over and glue or "sandwich glue" the wall section. Allow a five minute drying time for sandwiched sections to prevent warping.
- After the walls have dried cut away the bumpy upper ridge.
- Fold the outer flaps inward slightly and that's it! *(See above photos for reference)*

Edging Color: Brown felt *(What is "Edging"? Refer to the "Beginners Guide" included with this model set)*
