

"Bar, Barstools and food tray"

An absolutely essential model combo for your Pub or Inn. Thankfully it's a very easy model to put together.

Step 1

- To construct the bar follow the "Box Fold" tutorial. The food tray is fairly self-explanatory: cut it out and your done. The bar stools are simplicity defined! There are eight bar stools on the sheet. Cut and score where noted. Fold the stools and you will be left with the final obvious step. Glue the flaps and your done.
