

## "Kegs & Keg Shelves"

### Instructions

- There is two models in this set that require the "Box Fold" technique, those being: The Keg shelves (pictured right) and the Keg tables (under the kegs at left). The kegs themselves are really quite easy to build. Once you have cut and scored the kegs where noted simply fold them and glue the lengthwise glue tab to the inside of the keg. Apply a small drop of glue on one of the remaining end glue tabs and glue it flush to the inside of the keg. On the remaining tab apply a large enough drop of glue so that when put in place the tab will "automount" itself to that spot. Apply a bead of glue to the bottom of the keg and mount it to the top of the keg table with a slight overhang (see photo).
