

"Beds & Nightstands"

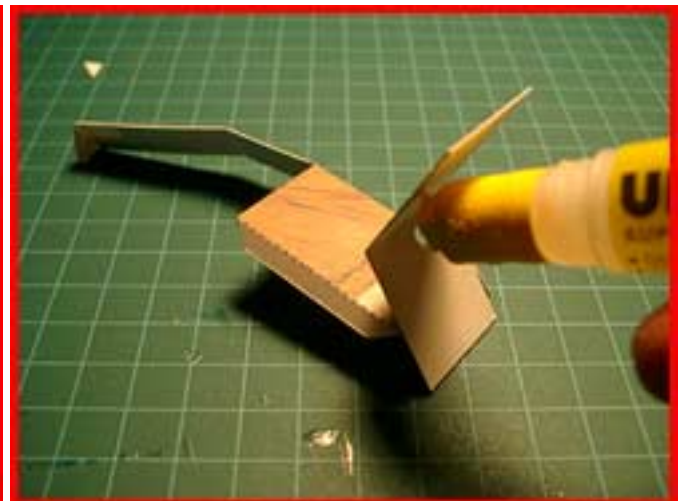

Instructions

- The beds combines two folds, the "Box Fold" and the chair fold. The wash basin/nightstand is fairly self-explanatory and goes together in the same way as the tables do. The beds on the other hand are difficult to explain in simple terms so instead...follow the pretty pictures ;)

You should wind-up with a crazy folded mass like the following:

Glue the white space below the headboard and then sandwich glue the backboard.

Glue the tab closest to the headboard in place

Glue the opposing tab to the other side of the headboard. Make sure the top bed glue tab is inserted while you glue this tab.

Pull the bed glue tab up a bit and glue. Reinsert the tab and apply pressure.

Cut the white space off above the headboard and you're all done!
